As Beyond Solutions Sp. z o.o., we operate in the field of data processing. We provide scalable, secure, and sovereign infrastructure services (cloud, IaaS, colocation) as well as expert managed services. We design, maintain, and develop demanding IT environments, ensuring the highest level of security and access to critical data so that clients and partners can grow steadily, build competitive advantages, and innovate. At Beyond Solutions, we place great importance on the highest standards of data protection, IT security, as well as environmental and legal norms. Therefore, we offer services using the secure and low-emission infrastructure of data centers of our sister company – Beyond.pl Sp. z o.o.

To reduce the negative impact on the environment, the Management Board has established an Environmental Policy, which will be implemented through:

- Shaping pro-environmental attitudes among employees.
- Ensuring employee involvement in the implementation of environmental objectives and tasks.
- Ensuring the right competencies for employees implementing environmental goals and objectives.
- Proper communication of environmental aspects in the company's operational activities.
- Using technologies and solutions that will generate the greatest possible added value with the minimum use of resources.
- Reduction of stocks and waste through improving continuous management techniques.
- Commitment to climate protection by promoting the Green Data Centre concept.

The Board of Beyond Solutions L declares its readiness to systematically implement the principles of the Environmental Policy and commits itself to:

- Take responsibility for the effectiveness of the environmental management system.
- To continually improve the effectiveness of actions aimed at reducing and preventing negative impacts on the environment.
- To comply legal and other environmental requirements in the Company's area of operation, relating to environmental aspects.
- Continuous raising of environmental awareness among stakeholders.

The Environmental Policy is public and available to all stakeholders.
